## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 67- 71, 73, 75-77, 79-85, 92-96, 97, 114-117, 120, 121, 127-138 are rejected under 35 U.S.C. 102(b) as being anticipated Chen et al. USPN 5990377.

As to claim 67, 114, 120, 121, and 127-138, see Abstract; col. 1, lines 20-32; col.

## Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 68, 72, 74, 86, 89, 90, 91, 101-113, 118, 119 rejected under 35 U.S.C. 103(a) as being unpatentable over Chen USPN 5990377.

As to claims 68, 72, 103, and 118, Chen describes an uncreped three dimensional through dried celluosic web of bulk enhancing fibers. Chen does not specifically describe the exact number of layers of the multi-ply structure. However, Chen discloses a multi-layer structure is desired allowing better control of physic properties by tailoring the material composition of each layer (col. 3 ,lines 55-62). It would have been obvious to one or ordinary skill in the art to use the claimed number of plies and folded stacks as a mere modification of a specific size and shape does not patentably distinguish the claimed invention from the prior art.

Art Unit: 3761

As to claims 74, 86, 89, 90, 91, 101, 102, and 104-113, Chen discloses the present invention substantially as claimed. However, Chen does not disclose the claimed absorbent capacity. Chen describes the basis weight, density and materials. Regarding the absorbent capacity and the examiner's interpretation of the test and performance characteristics of the instant apparatus claims, when the structure recited in the reference is substantially identical to that of the claims of the instant invention, claimed properties or functions are presumed to be inherent (MPEP 2112-2112.01). A *prima facie* case of either anticipation or obviousness has been established when the reference discloses all the limitations of a claim except a property or function and the examiner can not determine whether or not the reference inherently possesses properties which anticipate or render obvious the claimed invention but has basis for shifting the burden of proof as in *In re Fitzgerald*, 619 F.2d 67, 70 205 USPQ 594, 596 (CCPA 1980).
